

Flow on demand

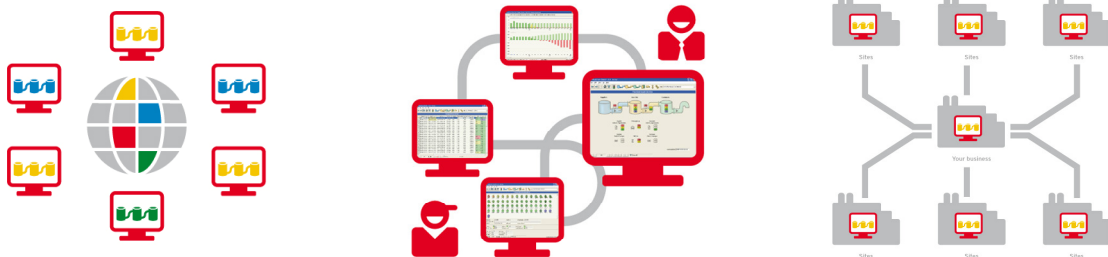

Improve Your Supply Chain!

PipeChain®

ROI ASAP by combining PipeChain with Microsoft Dynamics NAV/AX. We offer global supply chain automation and visibility, enabling real-time insights into all aspects of your supply and distribution channels - multi-site and multi-tier.

Combining Microsoft's *Dynamics NAV/AX 2009* and PipeChain's *Flow on Demand* platform brings multi-site and multi-tier improvements to companies running processes associated with production and distribution of products. This global SaaS offering is a scalable ready-to-use platform in process of being *certified for Dynamics*.

The combination of Dynamics NAV/AX and PipeChain, via the Microsoft Dynamics' role center, offers solutions for upper midmarket businesses seeking multi-site management and deeper pre-built processes for improved supply chain management.

Pre-built processes for your multi-site and multi-tier environment

PipeChain's pre-built processes for Dynamics NAV/AX include Customer Vendor Managed Inventory, Supplier Vendor Managed Inventory, Sales Order Collaboration for automated traditional order management towards customers, and Purchase Order Collaboration for automated order management towards suppliers. All these pre-built processes are included in one single software.

About PipeChain

With more than 30 years of logistic experience PipeChain is the most comprehensive European supply chain management company, offering a software platform and operational services combined with a thorough supply chain competence. Taking a holistic business perspective, the PipeChain makes customers more competitive and profitable by improving their supply chain.

PipeChain's installed base comprises manufacturing and distributing companies; e.g. the electronic and telecom industries, automotive, healthcare, consumer goods and packaging. Among others you find Ericsson, HANZA-Tarkon, Amphenol, Volvo Powertrain, Polarbröd, Atlet, Mölnlycke Healthcare, IKEA, Stadium, The Absolut Company, Smurfit Kappa Group, DS Smith and SCA Packaging.

The well-proven solutions are excellent for automating and controlling global supply chains. Thousands of users in more than 30 countries supervise and control their supply chains with PipeChain.
