

PIPECHAIN SCM LOGISTICS

LOGISTICS WITH BOUNDLESS FLOW THROUGH THE RIGHT SYSTEM SOLUTIONS

For more than 25 years, PipeChain has been helping companies with both transportation and customs proceedings. Our cloud-based, user-friendly systems make it easy to handle all types of customs and transportation matters, giving you better control over your flow of outgoing and incoming goods.

Our offer in Customs

Flexible and scalable solution that gives you control over the entire customs process.

- A customs system for your customs processes in both Sweden and Norway.
- Customs warehouse with automated function for "best pick".
- Both manual and integrated solutions.
- Traceability and reports to meet customs authorities requirements.

Our offer in Transport

Optimized solution that simplifies operations and strengthens your competitiveness.

- A TA system for connecting all your carriers.
- Calculation of emissions and your carbon footprint.
- Freight and invoice reconciliation that ensures correct payments.
- Manual or fully integrated with your ERP system.
- The right documents and labels per carrier.

Solutions for Customs

Fast, easy and traceable

PipeChain has extensive experience in helping importing and exporting companies, customs agents and warehouse keepers with customs management. The system is automatically updated with the latest legal requirements and regulations from both the Swedish and the Norwegian Customs Authorities, so you don't have to worry about any complicated and time-consuming problems with your declarations.

- Cost-effective solutions: Handle customs management yourself and save both time and money.
- System-independent integrations: Create, send and track customs declarations directly in the system.
- User-friendly interface: Quickly and easily manage all import and export declarations.
- Customs warehouse accounting and traceability: Get full control over balance levels, item information and inbound and outbound deliveries according to applicable requirements.

Result: A flexible and scalable solution that gives you full control over the entire customs handling process.

Solutions for Transport

Smooth flow from start to finish

PipeChain ensures that companies gain control over their product flows with integrated transport administration solutions, among other things.

By automating transport planning, you get accurate information about what the delivery contains, when it arrives and how much the freight costs.

- All information collected in one TA system: Better information quality, traceability and control over the entire chain.
- Environmental reporting function that calculates transport emissions and your climate footprint.
- Economical transport choices: Our integrated system solutions automatically generate information that helps you make the best choice.
- Follow-up and negotiation: Do better business with your transporters using statistics and information from previous deliveries.
